

COVID-19 Resources for the Deaf Community from Linguabee:

Linguabee can be a critical lifeline for communities in need. Many people still need communication access when utilizing essential services.

Here are some things we are doing right now to try and help:

Free video remote interpreter access during COVID-19 testing

We are providing [remote video interpreter \(VRI\) access at no cost](#) (to anyone) for community members seeking COVID-19 testing at a testing site. If someone needs an interpreter at a test site, they can reach out to us and we will provide them with connection instructions in advance of their arrival.
